## Commands for form XObjects

### L<sup>A</sup>T<sub>E</sub>X PDF management testphase bundle

The L<sup>A</sup>T<sub>E</sub>X Project\*

Version 0.95a, released 2021-02-22

## 1 l3pdfxform documentation

This module contains a number of commands to create “form XObjects”, for which pdfT<sub>E</sub>X introduced the short name “xforms”.

The status is still beta, so the style itself is currently named **l3pdfxform-beta**. Missing is for example code for the dvips route. Probably some of the function will also need to be enhanced by hooks.

<code>\pdfxform_new:nnn</code>	<code>\pdfxform_new:nnn {&lt;name&gt;} {&lt;attributes&gt;} {&lt;content&gt;}</code>
New: 2019-08-05	This command create a new form XObject that can be used as appearance or directly later. If the <i>&lt;content&gt;</i> contains BDC-marks it should <i>not</i> be given as a previously typeset box, but directly so that the names of the BDC-marks can be added to the resources of the xform. The xform will automatically include the resources of the current page. The content will be typeset in a hbox. With pdf <sub>l</sub> atex and luatex the surrounding color is <i>not</i> stored in the form XObject but should be if wanted added e.g. with <code>\color_select:n{.}</code> . This keeps the option of color injection open.

<hr/>	<hr/>
<code>\pdfxform_use:n</code>	<code>\pdfxform_use:n {&lt;name&gt;}</code>
New: 2019-08-05	This command uses (typesets) a previously created form XObject. If the surrounding color is different, it is injected in the form XObject with the engines pdf <sub>l</sub> tex or luatex.
<hr/>	<hr/>
<code>\pdfxform_ref:n *</code>	<code>\pdfxform_ref:n {&lt;name&gt;}</code>
New: 2019-08-05	Inserts the appropriate information to reference the xform <i>&lt;name&gt;</i> in for example appearance dictionaries.
<hr/>	<hr/>
<code>\pdfxform_wd:n *</code>	<code>\pdfxform_wd:n {&lt;name&gt;}</code>
<code>\pdfxform_ht:n *</code>	These command give back the sizes of the form XObject. The values are stored in tl-variables with the unit pt and not in dimensions!
<code>\pdfxform_dp:n *</code>
